

Advanced Demand Forecasting

Achieve Lean Operations & Top Fill Rates

DDI System's **Inform ERP Software** combines everyday operational benefits in accounting, inventory, sales, purchasing and pricing with the latest sales driving tools such as cloud connectivity, mobile apps, CRM, real-time eCommerce and more.

HIGHLIGHT: Demand Forecasting & Purchasing

Inform ERP's professional demand forecasting tools turn purchasing managers into inventory control experts. Powerful forecast algorithms, easy-to-use exception management, and intuitive purchasing screens provide buyers with tools exclusive to Inform. See the results in year-over-year profit and cash-flow improvement.

- ✓ Reduce inventory levels by up to 25%
- ✓ Minimize time spent on replenishment
- ✓ Reduce inventory carrying costs
- ✓ Eliminate dead and inactive stock

Real-Time Calculations Improve Purchase Orders

Respond to customer demand as it's occurring. Inform ERP bases advanced algorithm suggestions on your historical data and vendor minimums. Excel in demand planning utilizing the highest industry standards for:

- ✓ Unusual Demand
- ✓ Recurring Demand
- ✓ Warehouse Overstock Balance
- ✓ Multi-Location PO Projection
- ✓ Sporadic Demand
- ✓ Seasonal & Slow Moving Optimization
- ✓ Real-Time Vendor Purchase Summary

Multi-Location Inventory Management

Multi-location distributors face special challenges in balancing multi-branch inventory. Inform helps multi-location distributors transfer stock instead of purchasing with interactive overstock warning during purchase order projections. Inform independently manages costs, list prices, replenishment methods, A-B-C-X inventory rank, turns, and GMROI for every warehouse. Automate branch replenishment, manage customer and vendor consignment inventory.
